

ASP.NET Core

Duration: 4 Days **Course Code: ASPNET** **Delivery Method: Company Event**

Overview:

ASP.NET Core Course Overview

The ASP.NET Core course comprises sessions dealing with ASP.NET Core applications, MVC architecture (including writing models, views and controllers), entity frameworks, dependency injection, actions, Razor syntax, tag helpers, error handling, RESTful APIs, state management, testing, security and deployment.

Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

Who will the Course Benefit?

Objectives:

■ Course Objectives

- This ASP.NET Core course aims to provide the delegate with the knowledge to be able to produce web-based applications that make use of the most popular elements of the framework including MVC, Razor, Entity Framework, tag helpers, Blazor and Web API.
-

Prerequisites:

- Delegates attending this course should have some previous programming experience with C#. This knowledge can be obtained by attendance on the pre-requisite C# Developer course.
-

Content:

ASP.NET Core Training Course Course Contents - DAY 1

Course Introduction

- Administration and Course Materials
- Course Structure and Agenda
- Delegate and Trainer Introductions

Session 1: INTRODUCING ASP.NET

- ASP.NET Core and ASP.NET Framework
- Application Architecture
- Development tools

Session 2: MODEL-VIEW-CONTROLLER (MVC) APPLICATIONS

- MVC and .NET
- Models
- Views
- Controllers
- Blazor

Session 3: ENTITY FRAMEWORKS

- Entity Framework Core
- Database Access
- Data Migration
- Lazy,Eager and Explicit Loading

Session 4: MODELS

- Implementing Models
- Using Forms
- Validating Data ASP.NET Core Training Course Course Contents - DAY 2

Session 5: DEPENDENCY INJECTION

- Configuration Injection
- Action Injection
- Constructor Injection
- Service Injection

Session 6: CONTROLLERS

- Controllers and Actions
- Configuring Routes with the Routing Table
- Configuring Routes with Attributes

Session 7: NAVIGATION

- Filtering
- Partial Views

Session 8: VIEWS

- Razor Markup Language
- Validating View Data
- View Components ASP.NET Core Training Course Course Contents - DAY 3

Session 9: TAG HELPERS

- HTML Helpers
- Tag Attributes
- Environment and Link Helpers

Session 10: SINGLE PAGE APPLICATIONS

- Razor Pages and SPAs
- Handling Static Content

Session 11: ERROR HANDLING

- Custom Error Pages
- Dealing with Custom Exceptions
- Filtering Errors

Session 12: RESTFUL APIS

- Web API and RESTful APIs
- HTTP Request and Response
- Web API Action Methods
- Consuming a Web API ASP.NET Core Training Course Course Contents - DAY 4

Session 13: STATE MANAGEMENT

- HTTP and State
- Using Cookies to Manage State
- Caching

Session 14: UNIT TESTING

- Using xUnit
- Testing Models
- Testing Controllers

Session 15: SECURITY

- Authentication and Authorisation
- Using Identity
- Adding Windows Security

Session 16: DEPLOYMENT OPTIONS

- Deploying to IIS
- Deploying to Azure
