

Introduction to HTML & CSS

Duration: 1 Day Course Code: HCSSI Delivery Method: Company Event

Overview:

English - Please note this course is only available in English.
Nederlands - Let op: deze training is alleen in het Engels beschikbaar.
Français - Veuillez noter que ce cours est uniquement disponible en anglais.

Introduction to HTML & CSS Course Overview

HTML & CSS are the fundamental building blocks of the web. This course is designed to provide delegates with the fundamental knowledge of HTML & CSS.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

Who will the Course Benefit?

The course is aimed at those who are new to HTML & CSS and who need only know the basics (for now). The course serves as a foundation for further learning and provides just enough for those wishing to learn front-end JavaScript. For more in-depth coverage of the languages, delegates should instead consider the course: Modern, Responsive Websites with HTML & CSS.

Objectives:

- Course Objectives
 - This course aims to provide delegates with the skills and knowledge necessary to construct simple web pages that exploit most of the core HTML elements including text elements, hyperlinks, images, tables, and forms. Delegates should also be able to apply basic styling to HTML elements using core CSS selectors and properties.
-

Prerequisites:

- Delegates need only possess basic computing skills - navigate the filesystem, create and edit files and surf the web.
-

Follow-on-Courses:

Further Learning

- Modern, Responsive Websites with HTML & CSS
 - Core JavaScript
 - JavaScript Developer
-

Content:

Introduction to HTML ; CSS Training Course Course Contents - DAY 1
