

Apache Tomcat Administration

Duration: 3 Days **Course Code: TOMC** **Delivery Method: Company Event**

Overview:

Apache Tomcat Administration Course Overview

This Apache Tomcat Administration course teaches the core skills needed to install and manage the Tomcat Web Container up to version 9. As well as configuring the Tomcat Web Container, this hands-on course shows delegates how to deploy and monitor Java Enterprise Edition web applications. Delegates will also configure Tomcat to work with the Apache Web Server and third-party databases. We will also investigate troubleshooting, tuning and logging, as well as high availability concepts such as clustering and load balancing. Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

Who will the Course Benefit?

This Apache Tomcat Administration course is aimed at application server administrators. It may also benefit developers and system administrators who require a greater understanding of deployment and administration with Tomcat.

Objectives:

- Course Objectives
 - To provide the skills necessary to install, configure, manage, deploy applications to and understand the core aspects of Apache Tomcat.
-

Prerequisites:

- Good operating system knowledge similar to the level covered on our Linux Introduction course or an equivalent Windows course is required. Whilst no prior knowledge of Tomcat is required, delegates should be from a relevant technical background. Some awareness of internet architectures and protocols is assumed.
-

Follow-on-Courses:

Further Learning

- Apache Web Server
 - Developing Applications with Java EE
-

Content:

Apache Tomcat Administration Training Course Course Contents - DAY 1

Course Introduction

- Administration and Course Materials

Session 1: INTRODUCING TOMCAT

- Apache and Tomcat
- Application Servers and Web Containers
- Tomcat Component Tour
- Versions History and Capabilities

Session 2: JAVA ENTERPRISE EDITION ARCHITECTURE

- Java Enterprise Edition (JEE) Applications
- Servlets and JSP
- Tomcat the Web Container

Session 3: INSTALLING TOMCAT

- Installation Options
- Setting up Java
- Installing the Tomcat Web Container
- Validating a Successful Installation

Session 4: CONFIGURATION ESSENTIALS

- The Tomcat Directory Structure
- Understanding the Configuration Files
- The Component Architecture
- JVM Configuration Apache Tomcat Administration Training Course Course Contents - DAY 2

Session 5: LOGGING AND MONITORING

- Understanding Log Files
- Troubleshooting
- Load Testing
- Interpreting Results
- Monitoring with Tomcat Manager
- Threads and Memory

Session 6: DEPLOYING APPLICATIONS

- Deploying WAR Files
- Hot Deployment
- Deploying Unpacked Files
- Deploying with Tomcat Manager

Session 7: DEFINING DATASOURCES

- Configuring a JDBC Datasource
- Using JNDI Resources
- Connection Pooling Apache Tomcat Administration Training Course Course Contents - DAY 3

Session 8: WORKING WITH WEB SERVERS

- Tomcat and the Apache Web Server
- Advantages and Disadvantages of Web Servers
- Configuring Apache with Tomcat
- Virtual Hosting

Session 9: CLUSTERING

- Clustering Benefits
- Setting up Clustering
- Load Balancing and Failover

Session 10: SECURITY CONSIDERATIONS

- File System Security
- Realms, Roles and Users
- Java Security Manager
- SSL Configuration

Session 11: HARDENING TOMCAT INSTALATIONS

- Restricting Interfaces
- Operating System Privileges
- Handling Sessions
- Securing Default Settings

Session 12: CUSTOM TOMCAT BUILDS

- Support Libraries
- Setting up Apache Ant
- Generating Builds
