## Check Point Certified Troubleshooting Administrator (CCTA)

**Duration: 2 Days    Course Code: T-VPN-03**

---

### Overview:

The Check Point Certified Troubleshooting Administrator (CCTA) provides an understanding of the concepts and skills necessary to troubleshoot issues that may occur when managing the CheckPoint Security Management architecture and Security Gateways

---

### Target Audience:

This course is designed for security administrators and Check Point resellers who need to manage and monitor issues that may occur within their Security Management environment.

---

### Objectives:

- |  |  |
|--|--|
| ■ Course Topics                                      | ■ Troubleshooting Issues with SmartConsole   |
| ■ An Introduction to Troubleshooting                 | ■ Troubleshooting Log Connectivity Issues    |
| ■ SmartConsole and Policy Management Troubleshooting | ■ Investigating Log Connectivity Issues      |
| ■ Monitoring Logging Activity                        | ■ Investigating NAT Issues                   |
| ■ Troubleshooting Issues with NAT                    | ■ Troubleshooting General Traffic Issue      |
| ■ Understanding the Unified Access Control Policy    | ■ Evaluating HTTP and HTTPS Traffic Issues   |
| ■ Basic VPN Troubleshooting                          | ■ Troubleshooting Site-to-Site VPN Issues    |
| ■ Monitoring ClusterXL Connections                   | ■ Troubleshooting Clustering Issues          |
| ■ Understanding Identity Awareness                   | ■ Troubleshooting Identity Awareness         |
| ■ Lab Exercises                                      | ■ Configuring and Testing Identity Collector |
| ■ Monitoring Security Gateway Traffic                |  |
- 

### Prerequisites:

- Working knowledge of UNIX and/or Windows operating systems
- Working knowledge of Networking TCP/IP
- CCSA training/certification
- Advanced knowledge of Check Point Security products

### Testing and Certification

- 
-

## Content:

- |   |   |  |
|---|---|--|
| <ul style="list-style-type: none"><li>■ Understand how to use Check Point resources for support.</li><li>■ Understand how to perform packet captures using tcmdump and FW Monitor command tools.</li><li>■ Understand the basic process of kernel debugging, and how debug commands are structured.</li><li>■ Recognize how to use various Linux commands for troubleshooting system issues.</li><li>■ Recognize communication issues that may occur between SmartConsole and the SMS and how to resolve them.</li><li>■ Understand how to troubleshoot SmartConsole login and authentication issues.</li><li>■ Understand how to prevent and resolve licensing and contract issues.</li><li>■ Understand how to troubleshoot issues that may occur during policy installation.</li></ul> | <ul style="list-style-type: none"><li>■ Understand communication issues that may occur when collecting logs and how to resolve them.</li><li>■ Recall various tools to use when analyzing issues with logs.</li><li>■ Understand how to restore interrupted communications during heavy logging.</li><li>■ Understand how NAT works and how to troubleshoot issues.</li><li>■ Understand Client Side and Server Side NAT.</li><li>■ Understand how the Access Control Policy functions and how the access control applications work together.</li><li>■ Understand how to troubleshoot issues that may occur with Application Control and URL Filtering.</li><li>■ Understand how the HTTPS Inspection process works and how to resolve issues that may occur during the process.</li></ul> | <ul style="list-style-type: none"><li>■ Understand how to troubleshoot Content Awareness issues.</li><li>■ Recognize how to troubleshoot VPN-related issues.</li><li>■ Understand how to monitor cluster status and work with critical devices.</li><li>■ Recognize how to troubleshoot State Synchronization.</li><li>■ Understand how to troubleshoot communication issues between Identity Sources and Security Gateways.</li><li>■ Understand how to troubleshoot and debug issues with internal Identity Awareness processes.</li></ul> |
