

IBM PowerSC Workshop

Duration: 3 Days **Course Code: AN80G** **Delivery Method: Virtual Learning**

Overview:

This hands-on course is designed to provide students with a comprehensive understanding of IBM PowerSC, including its features, benefits, and how to install, configure, and manage it.

We will cover the four main pillars of PowerSC: Security, Compliance, threat protection, and Multifactor Authentication (MFA).

File Integrity Monitoring (FIM), allow listing, block listing, endpoint detection and response (EDR) and anti-malware capabilities will also be covered.

Target Audience:

Typical students may include: Customers, Technical IBM personnel, Business partner technical personnel, IT consultants and architects.

Objectives:

- After this course participants should be able to:
- Describe the key features and capabilities of PowerSC across AIX, IBM i, and Linux
- Perform the installation and initial configuration
- Summarize the purpose and usage of security compliance profiles
- Demonstrate how to manage and monitor endpoint security
- Configure system scans, reporting, and alerting mechanisms
- Explain the role and implementation of Multi-Factor Authentication (MFA)
- Implement anti-malware features and verify their effectiveness
- Configure allow lists using Trusted Execution and Fapolicyd for application security
- Analyze file integrity monitoring reports using Real-Time Compliance and auditd

Prerequisites:

■

Content:

- | | | |
|--|---|--|
| <ul style="list-style-type: none"> ■ Unit 0: Course Introduction ■ Unit 1: Introduction to IBM PowerSC on IBM Power (covering AIX, IBM i and Linux) ■ Unit 2: Installation and Configuration of IBM PowerSC ■ Unit 3: Security Compliance profiles ■ Unit 4: Managing and Monitoring endpoint security ■ Unit 5: Configuring system scans, reporting and alerting ■ Unit 6: Introduction to MFA | <ul style="list-style-type: none"> ■ Unit 7: Anti-malware ■ Unit 8: Allow List (Trusted Execution and Fapolicyd) ■ Unit 9: File Integrity Monitoring (Real Time Compliance and auditd) ■ Exercises ■ Exercise 1. Accessing the lab environment ■ Exercise 2. PowerSC Installation and Configuration ■ Exercise 3. Working with Security Profiles | <ul style="list-style-type: none"> ■ Exercise 4. Creating Custom Profiles and Run Compliance Scans ■ Exercise 5. Configuring MFA on AIX ■ Exercise 6. Configuring Anti-malware ■ Exercise 7. Allow List (Trusted Execution and fapolicyd) ■ Exercise 8. File Integrity Monitoring (Real Time Compliance and auditd) |
