

Db2 12 for z/OS Advanced Database Administration

Duration: 2 Days **Course Code: CV880G** **Delivery Method: Virtual Learning**

Overview:

This course will introduce the student to advanced database administration skills, including program preparation and the use of packages, online schema changes, partition management, and stored procedures; as well as performance and availability features of utilities (including LOAD, REBUILD INDEX, REORG, and UNLOAD). This course does not cover distributed data processing, nor does it cover data sharing.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Students needing to augment their skill set in administering a Db2 12 for z/OS database environment.

Objectives:

- Program preparation and the use of packages part 1
 - Program preparation overview
 - Execution time errors
 - BIND actions
 - Package status and REBIND
 - Deleting a package
 - Determining the table/view qualifier
- Online schema changes part 1
 - Changing data type
 - Adding columns to a table
 - Renaming columns in a table
 - Renaming indexes
 - Adding columns to indexes
 - Versioning
- Online schema changes part 2
 - Pending online schema changes
 - Dropping columns from a table
 - Converting to UTS
 - Other pending changes
- Commands for stored procedures
 - Execution privileges
 - Catalog information
 - LOAD and REBUILD INDEX
 - LOAD with parallel index build
 - LOAD partitions in parallel
 - REBUILD INDEX
 - Inline image copies and statistics
 - LOAD SHRLEVEL CHANGE
 - LOAD REPLACE SHRLEVEL REFERENCE
 - REORG
 - Performance features of REORG
 - Online REORG
 - Inline image copies and statistics
 - Consideratons for PBG table spaces
 - Online REORG with LOBs (optional)
- UNLOAD
 - Overview
 - Image copy specification

- • Impact of pending changes on immediate options
 - • Restrictions and considerations
 - Partition management part 1
 - • Adding partitions
 - • Rotating partitions
 - Partition management part 2
 - • Modifying limit keys
 - • Rebalancing partitions
 - Stored procedures part 1
 - • External stored procedures
 - • WLM-established application environments
 - • Altering and dropping a stored procedure
 - • Table-only input specification
 - • SHRLEVEL option
 - • Modes of operation
 - Program preparation and the use of packages part 2 (optional)
 - • Table mirroring
 - • Package versioning
 - • Plan management
 - • Other REBIND PACKAGE options
 - • Application compatibility
 - Stored procedures part 2 (optional)
 - • Native stored procedures
 - • Native procedure deployment
-

Prerequisites:

- Familiarity with the z/OS operating system, including TSO, ISPF, and SDSF.
 - Familiarity with SQL DML (SELECT, INSERT, UPDATE, DELETE, and MERGE) and DDL (CREATE, ALTER, DROP) statements
 - Basic skills administering a Db2 12 for z/OS database environment, including the use of basic utilities, serialization, and basic database security.
-
