

IBM Storage Scale Basic Administration for Linux and AIX

Duration: 3 Days **Course Code: H005G** **Delivery Method: Virtual Learning**

Overview:

This course is intended for IT professionals tasked with administering a GPFS system. This course includes information on installing, configuring and monitoring a GPFS cluster. Many features are described and tested in hands on lab activities including: Storage management, HA options, cluster management and information lifecycle management (ILM) tools.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Please refer to Course Overview for description information.

Objectives:

- Install and Configure GPFS
- Implement a highly available GPFS cluster
- Use Administration Tools
- Describe the ILM tools available and how to use them

Prerequisites:

You are expected to have a good understanding of UNIX/Linux, SAN and Storage concepts.

Content:

- Introduction
- Installation and Configuration
- GPFS Cluster
- Information Life Cycle Tools
- High Availability
- Management and Monitoring
- Multi-cluster
