
webMethods Integration Platform Administration

Duration: 5 Days **Course Code: WM430G** **Delivery Method: Virtual Learning**

Overview:

Learn how to install, update, configure, monitor and troubleshoot the important components of the webMethods Integration platform. The course is designed to enable a participant to undertake both one-time and day to day administrative duties, from development to production.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.
