SAP Fiori System Administration

Duration: 3 Days   Course Code: UX200

Overview:

This course is designed to give participants a detailed look at the administration tasks and activities necessary to support the SAP Fiori solution. Participants will learn how to install, configure and customize the Fiori landscape, as well as how to configure ancillary systems in the total solution (e.g. System Configuration, Trusted RFC, Gateway/System Aliases, FLP and App-specific services). Finally, learner will explore how to deploy, manage, and monitor SAP Fiori standard and customized applications.

Target Audience:

- Solution Architect
- System Administrator

Objectives:

- Understand the installation steps for SAP Gateway, Central UI, Product UI, and SAP Web Dispatcher

- Perform system configuration for Trusted RFC, Gateway/System Aliases, FLP Services, and App-specific services

- Perform enterprise Search Configuration

- Perform HANA configuration (Functional Units, Data Models, OData Services, etc.)

- Understand security

- Understand authentication

- Perform monitoring

Prerequisites:

Essential

- SAPTEC
- ADM100
Recommended

- General understanding of administration of enterprise systems
