

SAP Fiori System Administration

Duration: 3 Days **Course Code: UX200** **Delivery Method: Virtual Learning**

Overview:

This course is designed to give participants a detailed look at the administration tasks and activities necessary to support the SAP Fiori solution. Participants will learn how to install, configure and customize the Fiori landscape, as well as how to configure ancillary systems in the total solution (e.g. System Configuration, Trusted RFC, Gateway/System Aliases, FLP and App-specific services). Finally, learner will explore how to deploy, manage, and monitor SAP Fiori standard and customized applications.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.
