

IBM Spectrum Scale Basic Administration for Linux and AIX

Duration: 3 Days **Course Code: H005G** **Delivery Method: Virtual Learning**

Overview:

This course is intended for IT professionals tasked with administering an IBM Storage Scale storage cluster in Linux and AIX environments. It includes information on installing, configuring, and monitoring an IBM Storage Scale cluster. Many Storage Scale features are described in lecture materials and then implemented in lab exercises. These features include: Storage management, high availability options, cluster management, and information lifecycle management (ILM) tools.

Note: Although the lab environment is running the Linux operating system, the differences in Storage Scale compared with an AIX environment are minor. Therefore, the skills acquired during the course can be applied in both Linux and AIX environments.

Upon completion of this course, you can request an IBM badge that recognizes your skills and knowledge in this area.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This lecture and exercise-based course is for individuals who want to understand how to install, configure, and manage an IBM Storage Scale cluster.

Objectives:

- | | |
|--|--|
| ■ After completing this course, you should be able to: | ■ Manage a cluster |
| ■ Summarize the key features of IBM Storage Scale | ■ Implement information lifecycle management (ILM) |
| ■ Describe IBM ESS and Storage Scale RAID | ■ Configure IBM Storage Scale high availability features |
| ■ Install IBM Storage Scale and configure a cluster | ■ Back up critical cluster data |

Prerequisites:

■

Follow-on-Courses:

- H006G IBM Storage Scale Advanced Administration for Linux
- H008G IBM Storage Scale - Remote Data Access

Content:

Agenda

- Unit 1. IBM Storage Scale Overview
 - Unit 2. Installation and Cluster Configuration
 - Unit 3. Cluster Management
 - Unit 4. Information Lifecycle Management (ILM)
 - Unit 5. High Availability and Cluster Data Backups
-
