

Draft, analyze, and present with Microsoft 365 Copilot (MS-4018)

Duration: 1 Day **Course Code:** M-MS4018 **Delivery Method:** Company Event

Overview:

Learn how to use Microsoft 365 Copilot across Word, Excel, PowerPoint, Teams, Outlook, and Copilot Chat to draft content, analyze data, enhance collaboration, and create impactful presentations with AI assistance.

This course teaches learners how to use Copilot and agents to complete real-world workflows across Microsoft 365 apps. The course highlights how Copilot supports key business outcomes, including drafting content, analyzing data, preparing for meetings, and managing communication. Learners also see how Copilot Chat, in app experiences, and agents work together to combine organizational context and user intent across everyday work.

Updated July 2026

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

This course is designed for business users with a foundational understanding of Microsoft 365 who want to leverage Microsoft 365 Copilot to deepen their skills in drafting, analyzing, and presenting data. The target audience includes professionals who regularly create content, analyze data, prepare presentations, and manage communication as part of their role. These learners are looking to build confidence using Copilot to support everyday tasks and improve the quality of their work.

Objectives:

- **By the end of this course, learners will be able to:**
- Understand how Microsoft 365 Copilot uses organizational and web data to enhance productivity across Microsoft 365 apps.
- Create effective prompts and use Copilot Chat to generate accurate, context-aware results.
- Draft, edit, and refine professional documents using Copilot in Microsoft Word.
- Build and enhance presentations with Copilot in Microsoft PowerPoint, including content creation and speaker notes.
- Analyze, visualize, and gain insights from data using Copilot in Microsoft Excel.
- Improve meeting preparation, collaboration, and communication using Copilot in Microsoft Teams and Outlook.
- Use Copilot and agents to streamline everyday business workflows, increase efficiency, and improve decision-making.
- Apply Microsoft 365 Copilot securely while understanding enterprise data protection and governance considerations.

Prerequisites:

Attendees should meet the following prerequisites:

- Students should have basic functional experience with Microsoft 365 services.

Testing and Certification

None
