## Power Systems for AIX I: LPAR Configuration and Planning

**Varighed: 3 Days    Kursus Kode: AN11G**

---

### Beskrivelse:

**This is available as a 3-day Instructor Led Class**

**OR**

**Instructor-Led Virtual Class:**

\*\*\* The 3 course days are spread over 5 afternoon sessions

\*\*\* Session runs from 1:30pm to 5:30pm UK Time – for 5 days

Learn how to perform system administration in a Power Systems environment. Learn about the features of PowerVM Editions and how to configure and manage LPARs running AIX V7.1 using the Hardware Management Console (HMC).

---

### Målgruppe:

This course is appropriate for system administrators, technical support individuals, and IBM business partners who implement LPARs on IBM Power Systems.

---

### Agenda:

- Describe important concepts that are associated with managing POWER8 processor-based systems, such as logical partitioning, dynamic partitioning, virtual devices, virtual processors, virtual consoles, virtual local area network (VLAN), and shared processors
  - Describe the features of the PowerVM editions
  - Describe the functions provided by the HMC
  - Configure and manage the HMC, including users and permissions, software, start and shutdown, remote access features, network configuration, security features, HMC backup and restore options, and the HMC reload procedure
  - Describe the rules that are associated with allocating resources, including dedicated processors, processing units for Micro-Partitioning, memory, logical host Ethernet adapter, and physical I/O for AIX and Linux partitions
  - Configure and manage LPARs by using the HMC graphical user interface (GUI) and HMC commands
  - Interpret physical and AIX location codes and relate to the key hardware components
  - Power on and power off the Power Systems server
  - Use the HMC to back up and restore partition data
  - Perform dynamic LPAR operations (DLPAR)
- 

### Forudsætninger:

This introductory course does not require any logical partitioning experience.

General TCP/IP knowledge is strongly recommended. This prerequisite can be met by attending TCP/IP for AIX System Administrators (AN21G).

## Indhold:

### Day 1

- Welcome
- Unit 1: Introduction to partitioning
- Exercise 1: Introduction to partitioning
- Unit 2: Hardware system overview
- Exercise 2: System hardware components
- Unit 3: Hardware Management Console

### Day 2

- Unit 3: Hardware Management Console (continued)
- Exercise 3: Exploring the HMC V8 interface
- Unit 4: Hardware Management Console maintenance
- Exercise 4: HMC and managed system maintenance
- Unit 5: System power management
- Exercise 5: System power management
- Unit 6: Planning and configuring logical partitions

### Day 3

- Unit 6: Planning and configuring logical partitions (continued)
- Exercise 6: Configuring logical partitions
- Unit 7: Partition operations
- Exercise 7: Partition operations
- Unit 8: Dynamic LPAR operations
- Exercise 8: Dynamic LPAR operations

---

## Additional Information:

**This is available as a 3-day Instructor Led Class**

**OR**

**Instructor-Led Virtual Class:**

\*\*\* The 3 course days are spread over 5 afternoon sessions

\*\*\* Session runs from 1:30pm to 5:30pm UK Time – for 5 days

---
