
Korn and Bash Shell Programming

Varighed: 5 Days Kursus Kode: AN202G

Beskrivelse:

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

Målgruppe:

This advanced-level course is for support staff for AIX on POWER systems.

Agenda:

- You will have a firm grounding in the Perl language and be able to:
 - Use modules from the Perl Module Library to improve your efficiency
 - Write Perl scripts for data-processing, system administration, and other applications
-

Forudsætninger:

You should have:

- An understanding of programming fundamentals: variables, flow control concepts such as repetition and decision.
- A working knowledge of AIX including the use of the vi editor, find and grep commands.

Students without this experience should attend AIX Basics (AN10G).

Indhold:

- | | | |
|----------------------------------|---|--|
| ■ Basic shell concepts | ■ Functions and typeset | ■ Using regular expressions |
| ■ Flow control in a shell Script | ■ Shell features such as arithmetic and string handling | ■ Using sed, awk and other AIX utilities |
-
