Effective RACF Administration

Varighed: 4 Days   Kursus Kode: BE87G

Beskrivelse:

Practical online course shows how to plan and implement RACF to secure and protect the resources of an OS/390 system includes CICS, IMS and DFSMS environments.

Målgruppe:

Personnel with responsibility for implementing and maintaining a RACF security system.

Agenda:

- On completion, you will be able to:

- Identify the security requirements of a system

- Use RACF to protect resources

- Define users and resources to the system

- Set up a RACF group structure

-

- Use the RACF Report Writer

-

- Select options to tailor RACF

-

- Administer the system to meet the installation's security goals

-

- Develop a suitable implementation plan.

Forudsætninger:

Introduction to OS/390 System Services (ES05GB) or equivalent and some practical experience of working in an OS/390 environment.

Indhold:

- Implementation strategy
- Defining groups and users
- Protecting data sets, tape volumes and general resources
- Controlling CICS, IMS and DFSMS environments
- Exits and utilities
- DSMON monitor program
- RACF report writer
- Protection of JES facilities.

- Implementation strategy
- Defining groups and users
- Protecting data sets, tape volumes and general resources
- Controlling CICS, IMS and DFSMS environments
- Exits and utilities
- DSMON monitor program
- RACF report writer
- Protection of JES facilities.

- Implementation strategy
- Defining groups and users
- Protecting data sets, tape volumes and general resources
- Controlling CICS, IMS and DFSMS environments
- Exits and utilities
- DSMON monitor program
- RACF report writer
- Protection of JES facilities.

- Implementation strategy
- Defining groups and users
- Protecting data sets, tape volumes and general resources
- Controlling CICS, IMS and DFSMS environments
