

IBM QRadar SIEM Foundations

Varighed: 3 Days Kursus Kode: BQ104G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

IBM Security QRadar enables deep visibility into network, endpoint, user, and application activity. It provides collection, normalization, correlation, and secure storage of events, flows, assets, and vulnerabilities. Suspected attacks and policy breaches are highlighted as offenses. In this course, you learn about the solution architecture, how to navigate the user interface, and how to investigate offenses. You search and analyze the information from which QRadar concluded a suspicious activity. Hands-on exercises reinforce the skills learned.

In this 3-day instructor-led course, you learn how to perform the following tasks: Describe how QRadar collects data to detect suspicious activities Describe the QRadar architecture and data flows Navigate the user interface Define log sources, protocols, and event details Discover how QRadar collects and analyzes network flow information Describe the QRadar Custom Rule Engine Utilize the Use Case Manager app Discover and manage asset information Learn about a variety of QRadar apps, content extensions, and the App Framework Analyze offenses by using the QRadar UI and the Analyst Workflow app Search, filter, group, and analyze security data Use AQL for advanced searches Use QRadar to create customized reports Explore aggregated data management Define sophisticated reporting using Pulse Dashboards Discover QRadar administrative tasks

Extensive lab exercises are provided to allow students an insight into the routine work of an IT Security Analyst operating the IBM QRadar SIEM platform. The exercises cover the following topics: Architecture exercises UI Overview exercises Log Sources exercises Flows and QRadar Network Insights exercises Custom Rule Engine (CRE) exercises Use Case Manager app exercises Assets exercises App Framework exercises Working with Offenses exercises Search, filtering, and AQL exercises Reporting and Dashboards exercises QRadar Admin tasks exercises

The lab environment for this course uses the IBM QRadar SIEM 7.4 platform.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Målgruppe:

This course is designed for security analysts, security technical architects, offense managers, network administrators, and system administrators using QRadar SIEM.

Agenda:

- After completing this course, you should be able to perform the following tasks:
- Describe how QRadar collects data to detect suspicious activities
- Describe the QRadar architecture and data flows
- Navigate the user interface
- Define log sources, protocols, and event details
- Discover how QRadar collects and analyzes network flow information
- Learn about a variety of QRadar apps, content extensions, and the App Framework
- Analyze offenses by using the QRadar UI and the Analyst Workflow app
- Search, filter, group, and analyze security data
- Use AQL for advanced searches
- Use QRadar to create customized reports
- Explore aggregated data management

- Describe the QRadar Custom Rule Engine
- Utilize the Use Case Manager app
- Discover and manage asset information
- Define sophisticated reporting using Pulse Dashboards
- Discover QRadar administrative tasks

Forudsætninger:

Before taking this course, make sure that you have the following skills:

- IT infrastructure
- IT security fundamentals
- Linux
- Windows
- TCP/IP networking
- Syslog

Indhold:

Unit 12: QRadar Admin Console
