

Understand and Drive Your Salesforce Implementation

Varighed: 3 Days Kursus Kode: BSX-101

Beskrivelse:

Explore Salesforce features and functionality and gain the knowledge to make Salesforce implementation decisions with confidence. In this 3-day, heavily discussion-based class, learn about standard and custom objects and applications, data management, data visualization, flow automation tools, security mechanisms, and more. Successfully navigate the key phases and milestones of a Salesforce implementation, effectively communicate business needs, and provide directives to team members tasked with solution-building to deliver a robust Salesforce solution that achieves business goals.

Målgruppe:

This class is designed for individuals who are (or will soon be) supporting a Salesforce implementation in a decision-making capacity. This includes, but is not limited to, business analysts, IT managers, project managers, executive leaders, and executive sponsors. This class is not recommended for individuals tasked with solution-building.

Agenda:

- Identify key stakeholders needed for a successful Salesforce implementation.
 - Describe the Salesforce data model as it relates to Customer 360, Salesforce Clouds, and the Salesforce Platform.
 - Communicate the appropriate security measures needed to control org and data access.
 - Discuss which standard or custom objects and applications should be implemented based on specific requirements and use cases.
 - Effectively strategize how to migrate data into your Salesforce org while maintaining high data quality.
 - Understand Salesforce automation tools and how they solve for various business challenges.
 - Analyze Salesforce data with Reports and Dashboards.
 - Navigate the key phases and milestones of a Salesforce implementation.
-

Forudsætninger:

■
