

Red Hat OpenStack Administration II: Day 2 Operations for Cloud Operators

Varighed: 4 Days Kursus Kode: CL210

Beskrivelse:

Install, configure, and maintain a cloud computing environment using Red Hat Enterprise Linux OpenStack Platform

This course teaches system administrators how to implement a cloud-computing environment using Red Hat Enterprise Linux OpenStack Platform, including installation, configuration, and maintenance. Through hands-on labs, students will explore fault-tolerant and redundant configurations of Red Hat Enterprise Linux OpenStack Platform, and will also look at the future plans of the OpenStack development community. This course can also help you prepare for the Red Hat Certificate of Expertise in Infrastructure-as-a-Service exam.

Målgruppe:

Linux® system administrators and cloud administrators interested in, or responsible for, maintaining a private cloud.

Agenda:

- | | |
|---|---|
| ■ Get an overview of the Red Hat Enterprise Linux OpenStack Platform architecture | ■ Manage users and projects |
| ■ Install Red Hat Enterprise Linux OpenStack Platform | ■ Deploy virtual machines |
| ■ Manage Red Hat Enterprise Linux OpenStack Platform | ■ Learn about the future of Red Hat Enterprise Linux OpenStack Platform |

Forudsætninger:

RHCA certification or equivalent knowledge and experience.

Test og certificering

Indhold:

Red Hat Enterprise Linux OpenStack Platform architecture

- Understand Red Hat Enterprise Linux ; OpenStack Platform features and terminology.

Red Hat Enterprise Linux OpenStack Platform installation

- Install Red Hat Enterprise Linux OpenStack platform using packstack.
- Use Horizon web interface manage it.

Message broker

- Install and secure the Qpid message broker service.

Identity service

- Install, configure, and use the Keystone authentication services.

Object storage service

- Install and manage the Swift object storage service.

Image service

- Install the Glance image service.
- Import system images.

Block storage service

- Install the Cinder block storage service.
- Manage Cinder volumes.

Networking service

- Install, configure, and manage Red Hat Enterprise Linux OpenStack Platform networking service.

Compute and controller services

- Install Nova compute and controller.
- Learn how to add nova compute nodes.
- Launch an instance from the command line.

Additional compute node

- Learn to add and remove additional Nova compute nodes.

Orchestration service

- Install the Heat orchestration service.

Metering service

- Install and manage the Ceilometer metering service.
- Launch a stack.

The future of Red Hat Enterprise Linux OpenStack Platform Comprehensive review

- Review the installation and management of Red Hat Enterprise Linux OpenStack Platform.
