

Implementing Cisco Advanced Call Control and Mobility Services

Varighed: 5 Days Kursus Kode: CLACCM Version: 1.1 Leveringsmetode: Company event (Firmakursus)

Beskrivelse:

The Implementing Cisco Advanced Call Control and Mobility Services (CLACCM) training provides you with knowledge about advanced call control and mobility services, focusing on Cisco Unified Communications Manager features such as Globalized Call Routing, Global Dial Plan Replication, Cisco Unified Mobility, Cisco Extension Mobility, SIP URI call routing, Call Admission Control, Cisco Unified Communications Manager Express and SRST gateway technologies, Cisco Unified Border Element Call deployments, signaling and media protocols, and features such as call coverage and time of day routing.

This course is worth 40 Continuing Education (CE) credits

Firmakursus

Med et firmakursus bliver jeres it-kompetenceudvikling målrettet jeres behov. Det betyder, at vi hjælper med at finde og sammensætte det helt rigtige kursusindhold og den helt rigtige form. Kurset kan afgøres hos os eller kunden, standard eller virtuelt.

Målgruppe:

Collaboration engineers involved in the design, implementation and troubleshooting of Cisco collaboration advanced call control solutions and mobility services.

Agenda:

- **After completing this course you should be able to:**
- Analyze and troubleshoot SIP and media protocol
- Understand call recording options and implement time-of-day routing, call park, call pickup, and Meet-Me conferences in Cisco Unified Communications Manager
- Describe call recording options in Cisco Unified Communications Manager
- Describe how to implement call coverage in Cisco Unified Communications Manager
- Describe how to configure and troubleshoot Cisco Unified Communications Manager Extension Mobility
- Describe how to configure and troubleshoot Cisco Unified Communications Manager Unified Mobility
- Describe how to implement Cisco Unified Communications Manager Express for SIP phones

- Describe how to implement globalized call routing within and between Cisco Unified Communications Manager clusters
- Describe how to implement advanced and enhanced SRST in Cisco Unified Communications Manager and Cisco IOS gateways
- Describe how to implement CAC and AAR in Cisco Unified Communications Manager
- Describe how to implement URI calling in Cisco Unified Communications Manager for calls within a cluster and between clusters
- Describe how to troubleshoot multisite Cisco Unified Communications Manager deployments
- Describe how to implement ILS between Cisco Unified Communications Manager clusters and enable GDPR
- Configure and troubleshoot Cisco Unified Border Element

Forudsætninger:

Attendees should meet the following prerequisites:

- Internet web browser usability knowledge and general computer usage

Test og certificering

Recommended as preparation for the following exams:

- **300-815 - Implementing Cisco Advanced Call Control and Mobility Services (CLACCM) exam**

- Basic understanding of networking technologies
- Basic understanding of voice and video
- CLFNDU - Understanding Cisco Collaboration Foundations
- CLCOR - Implementing and Operating Cisco Collaboration Core Technologies

After you pass the 300-815 CLACCMexam you will earn the Cisco Certified Specialist - Collaboration Call Control & Mobility Implementation certification, and will satisfy the concentration exam requirement for the CCNP Collaboration professional-level certification:

- Discovery Lab 11: Implement Calling Privileges in Cisco Unified Communications Manager Express
- Discovery Lab 12: Implement Globalized Call Routing
- Discovery Lab 13: Implement TEHO, PSTN Backup, and CoS in a Globalized Call-Routing Deployment
- Discovery Lab 14: Implement Advanced Survivable Remote Site Telephony
- Discovery Lab 15: Implement Call Admission Control
- Discovery Lab 16: Implement a URI-Based Dial Plan for Multisite Deployments
- Discovery Lab 17: Troubleshoot Globalized Call Routing
- Discovery Lab 18: Troubleshoot Call Admission Control
- Discovery Lab 19: Implement Global Dial Plan Replication
- Discovery Lab 20: Implement Cisco Unified Border Element
- Discovery Lab 21: Troubleshoot Cisco Unified Border Element
