Docker Swarm Application Essentials

Varighed: 1 Day   Kursus Kode: CN110

Beskrivelse:

In this course, you'll learn what a containerized application looks like when orchestrated by Docker Swarm. We'll cover scheduling workloads across a cluster, networking stateless and stateful applications, provisioning dynamic configuration and persistent storage, and scaling highly available applications in this course intended to set a strong foundation in orchestration for all technical roles.

Målgruppe:

This course is targeted at students with the following:
Motivations: Develop, operate or manage scalable containerized applications orchestrated by Docker Swarm
Roles: General technical audiences & IT professionals

Agenda:

- Setting up and configuring a Swarm

- Deploying workloads on Swarm

- Networking Swarm workloads

- Provisioning dynamic configuration

- Provisioning persistent storage

- Application rollout and upgrade

- Advanced scheduling control

Forudsætninger:

Familiarity with the Bash shell

- Filesystem navigation and manipulation
- Command line text editors like vim or nano
- Common tooling like curl, wget and ping
Familiarity with YAML and JSON notation

- CN100 - Docker Containerization Essentials

Yderligere Kurser:
- CN210 - Docker Enterprise Operations
- CN310 - Advanced Docker Enterprise Troubleshooting

Indhold:

Lab Requirements

- Laptop with WiFi connectivity
- Attendees should have the latest Chrome or Firefox installed, and a free account at strigo.io.
