
Mirantis Secure Registry (MSR)

Varighed: 1 Day Kursus Kode: CN213 Leveringsmetode: Virtuel deltagelse

Beskrivelse:

In this product-focused course, you'll deep dive into all the features of Mirantis Secure Registry, and discover how it can enhance the security of your container image production, storage and distribution both as a stand-alone registry, or integrated into a continuous integration pipeline. We'll discuss installing and configuring MSR, managing MSR user permissions, enhancing registry security with content trust and binary security scanning, as well as registry management strategies like garbage collection, content caching, and webhook-driven third-party integrations.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This course is targeted at students with the following:

Motivations: Leverage all the features of Mirantis Secure Registry in order to enhance the security profile of container image content, distribution and execution.

Roles: System Operators & Administrators

Forudsætninger:

- Familiarity with the Bash shell
 - Filesystem navigation and manipulation
 - Command line text editors like vim or nano
 - Common tooling like curl, wget and ping
 - Familiarity with YAML and JSON notation
 - CN212 - Mirantis Kubernetes Engine (MKE)
-

Indhold:
