

Project Management Fundamentals

Varighed: 3 Days Kursus Kode: GK2868

Beskrivelse:

This course will teach you how to effectively manage all phases of a project. You'll learn the project management framework of initiation, planning, execution, control, and formal closing, and discover what it takes to ensure project success. In this skills-building course, you'll focus on practical tools and techniques as you spend 75% of the course working on a project-from initiation to close. You'll work individually and in teams to write objectives, conduct stakeholder analysis, and develop a work breakdown structure and risk management plan for a case study project. Practice using estimating techniques, dependency analysis, and network diagramming.

Målgruppe:

Associate project managers, project managers, IT project managers, project coordinators, project analysts, project leaders, senior project managers, team leaders, product managers, program managers, project team members, stakeholders, and senior managers who want to master project management.
