

Google Cloud Platform Big Data And Machine Learning Fundamentals (CPB100)

Varighed: 1 Day Kursus Kode: GO8325 Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This one-day instructor-led course introduces participants to the big data capabilities of Google Cloud Platform. Through a combination of presentations, demos, and hands-on labs, you will get an overview of the Google Cloud platform and a detailed view of the data processing and machine learning capabilities. This course showcases the ease, flexibility, and power of big data solutions on Google Cloud Platform.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

Data analysts getting started with Google Cloud Platform
Data scientists getting started with Google Cloud Platform
Business analysts getting started with Google Cloud Platform
Individuals responsible for designing pipelines and architectures for data processing, creating and maintaining machine learning and statistical models, querying datasets, visualizing query results and creating reports
Executives and IT decision makers evaluating Google Cloud Platform for use by data scientists

Agenda:

- In this course you will learn:
 - Train and use a neural network using TensorFlow
 - Purpose and value of the key Big Data and Machine Learning products in the GoogleCloud Platform
 - Employ ML APIs
 - Use Cloud SQL and Cloud Dataproc to migrate existing MySQL andHadoop/Pig/Spark/Hive workloads to Google Cloud Platform
 - Choose between different data processing products on the Google Cloud Platform
 - Employ BigQuery and Cloud Datalab to carry out interactive data analysis
-

Forudsætninger:

- Basic proficiency with common query language such as SQL
 - Experience with data modeling, extract, transform, load activities
 - Developing applications using a common programming language such Python
 - Familiarity with Machine Learning and/or statistics
-

Indhold:

1. Introducing Google Cloud Platform

- Google Platform Fundamentals Overview
- Google Cloud Platform Data Products and Technology
- Usage scenarios

2. Compute and Storage Fundamentals

- CPUs on demand (Compute Engine)
- A global filesystem (Cloud Storage)
- CloudShell

3. Data Analytics on the Cloud

- Stepping-stones to the cloud
- CloudSQL: your SQL database on the cloud
- Lab: Importing data into CloudSQL and running queries
- Spark on Dataproc

4. Scaling Data Analysis

- Fast random access
- Datalab
- BigQuery
- Machine Learning with TensorFlow
- Fully built models for common needs

5. Data Processing Architectures

- Message-oriented architectures with Pub/Sub
- Creating pipelines with Dataflow
- Reference architecture for real-time and batch data processing

6. Summary

- Why GCP?
- Where to go from here
- Additional Resources

Classroom Live Labs

Lab 1: Sign up for Google Cloud Platform

Lab 2: Set up a Ingest-Transform-Publish data processing pipeline

Lab 3: Machine Learning Recommendations with SparkML

Lab 4: Build machine learning dataset

Lab 5: Train and use neural network

Lab 6: Employ ML APIs
