

Google Understanding Cloud Spanner

Varighed: 3 Days Kursus Kode: GO8339 Leveringsmetode: Virtuel deltagelse

Beskrivelse:

Learn to build and administer Cloud Spanner databases, execute queries and transactions, and integrate scalable relational data services into cloud-native applications.

In this course, you learn about Cloud Spanner. You will get an introduction to Cloud Spanner and understand how it differs from other database products. You also learn when and how to use Cloud Spanner to solve your relational database needs at scale.

Updated Sept. 2026

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

- Customers

Agenda:

- **After this course participants should be able to:**
 - Build scalable, managed, relational databases by using Cloud Spanner.
 - Create and manage Cloud Spanner databases by using the CLI, Terraform, Python API, and the Google Cloud console.
 - Program and run queries and transactions by using the Cloud Spanner API
 - Integrate Cloud Spanner with applications
-

Forudsætninger:

Some prior Google Cloud experience at the fundamental level and experience with relational databases, the SQL language, and some programming are assumed.

Test og certificering

- This course supports preparation for the Google Professional Cloud Database Engineer Exam
-

Yderligere Kurser:

None

Indhold:

Module 01: The Need for Spanner

- What is Spanner?
- Spanner and the CAP Theorem
- History of Spanner
- Cloud Spanner Use Cases

Module 02: Getting Started with Spanner

- Planning Spanner Instances
- Automating Instance Creation
- Creating Databases in Spanner

Module 03: Optimizing Spanner Schemas

- Spanner Architecture
- Primary Keys
- Schemas
- Interleaving ; Foreign Keys
- Secondary Indexes

Module 04: Programming Applications, Queries, and Transactions

- Authentication ; Authorization
- Client Libraries
- Queries
- Transactions

Module 05: Deploying Spanner Applications

- Using Spanner in Apps
- Building Data Pipelines

Module 06: Spanner Administration

- Data Management
- Change Operations

Module 07: Best Practices

- Spanner Best Practices
- Challenge Lab

Additional Information:

Official course book provided to participants.
