

Configuring Windows Server Hybrid Advanced Services

Varighed: 4 Days Kursus Kode: M-AZ801 Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This course teaches IT Professionals to configure advanced Windows Server services using on-premises, hybrid, and cloud technologies. The course teaches IT Professionals how to leverage the hybrid capabilities of Azure, how to migrate virtual and physical server workloads to Azure IaaS, and how to secure Azure VMs running Windows Server. The course also teaches IT Professionals how to perform tasks related to high availability, troubleshooting, and disaster recovery. The course highlights administrative tools and technologies including Windows Admin Center, PowerShell, Azure Arc, Azure Automation Update Management, Microsoft Defender for Identity, Azure Security Center, Azure Migrate, and Azure Monitor.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This four-day course is intended for Windows Server Hybrid Administrators who have experience working with Windows Server and want to extend the capabilities of their on-premises environments by combining on-premises and hybrid technologies. Windows Server Hybrid Administrators who already implement and manage on-premises core technologies want to secure and protect their environments, migrate virtual and physical workloads to Azure IaaS, enable a highly available, fully redundant environment, and perform monitoring and troubleshooting.

Agenda:

- Secure Windows Server on-premises and hybrid infrastructures
- Implement Windows Server high availability
- Implement disaster recovery in Windows Server on-premises and hybrid environments
- Migrate servers and workloads in on-premises and hybrid environments
- Monitor and troubleshoot Windows Server environments

Test og certificering

Microsoft Certified: Windows Server Hybrid Administrator Associate

Indhold:

Secure Windows Server on-premises and hybrid infrastructures	Implement disaster recovery in Windows Server on-premises and hybrid environments	Monitor and troubleshoot Windows Server environments
<ul style="list-style-type: none">■ Implement Windows Server IaaS VM network security■ Audit the security of Windows Server IaaS Virtual Machines■ Manage Azure updates■ Create and implement application allowlists with adaptive application control■ Configure BitLocker disk encryption for Windows IaaS Virtual Machines■ Implement change tracking and file integrity monitoring for Windows IaaS VMs■ Secure Windows Server DNS■ Secure Windows Server user accounts■ Hardening Windows Server■ Windows Server update management	<ul style="list-style-type: none">■ Implement Hyper-V Replica■ Implement hybrid backup and recovery with Windows Server IaaS■ Protect your on-premises infrastructure from disasters with Azure Site Recovery■ Protect your Azure infrastructure with Azure Site Recovery■ Protect your virtual machines by using Azure Backup	<ul style="list-style-type: none">■ Monitor Windows Server IaaS Virtual Machines and hybrid instances■ Monitor your Azure virtual machines with Azure Monitor■ Monitor Windows Server performance■ Manage and monitor Windows Server event logs■ Implement Windows Server auditing and diagnostics■ Troubleshoot on-premises and hybrid networking■ Troubleshoot Windows Server Virtual Machines in Azure■ Troubleshoot Active Directory
Implement Windows Server high availability	Migrate servers and workloads in on-premises and hybrid environments	
<ul style="list-style-type: none">■ Introduction to Cluster Shared Volumes■ Implement Windows Server failover clustering■ Implement high availability of Windows Server VMs■ Implement Windows Server File Server high availability■ Implement scale and high availability with Windows Server VM	<ul style="list-style-type: none">■ Migrate on-premises Windows Server instances to Azure IaaS virtual machines■ Upgrade and migrate Windows Server IaaS virtual machines■ Active Directory Domain Services migration■ Migrate file server workloads using Storage Migration Service■ Migrate Windows Server roles■ Containerize and migrate ASP.NET applications to Azure App Service
