---

### Beskrivelse:

SDWSEC is a 3-day Cisco SD-WAN training targeted to engineers and technical personnel involved in designing, deploying, operating, and securing SD-WAN solutions both in enterprise and Service Provider environments. This training is specifically designed for partners and customers implementing secure Cisco SD-WAN integrated with the complete feature set of Cisco Umbrella including DNS Security, Cloud Based Firewall and Secure Internet Gateway. The course walks you through how each integration works and how to design and implement it step-by-step.

#### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.
