

## IBM i System Administration

Varighed: 5 Days    Kursus Kode: OL19G    Leveringsmetode: Virtuel deltagelse

### Beskrivelse:

This course explains how to plan for, implement, and manage the ongoing operations of the System i. Emphasis is on security, system availability, backup and recovery, system software management, and problem determination. You are also introduced to the architecture and terminology of IBM i and the System i.

This course provides lectures and hands on labs in a face-to-face classroom setting. The course is also offered in a live virtual classroom environment (ILO - Instructor Led Online) with hands-on labs IBM i Administration and Control - ILO (OV190).

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

### Målgruppe:

This course is for IT managers and their staff who are responsible for: Designing and implementing a security plan Implementing a backup and recovery plan Implementing a system availability plan Performing problem determination procedures and activities
