

## Cisco Optical Technology Intermediate Level

Varighed: 4 Days    Kursus Kode: OPT200

### Beskrivelse:

The Cisco Optical Technology Intermediate (OPT200) training course teaches the skills necessary to deploy Cisco Optical Networking System (ONS) 15454 Multiservice Transport Platform (MSTP) and Cisco Network Convergence System (NCS) 2000 Series networks from installation to protection.

### Målgruppe:

This course is for technical professionals who are responsible for installation, deployment and maintenance of the Cisco ONS 15454 MSTP and Cisco NCS 2000 Series networks. Network operations personnel, planners and designers can also benefit.

### Agenda:

- |  |   |
|--|---|
| ■ <b>After completing this course, you should be able to:</b>                | ■ Provision M12 WSS in linear and M6 SMR nodes in ring topologies             |
| ■ Connect to a Cisco ONS 15454 MSTP chassis using Cisco Transport Controller | ■ Understand configuration options for the Any Rate muxponder and crossponder |
| ■ Identify node configurations according to card population                  | ■ Perform Raman amplifier initialization                                      |
| ■ Provision DWDM circuits using the Cisco Transport Controller               | ■ Isolate optical network issues  |
| ■ Conduct performance monitoring, alarm verification, and fault isolation    |   |

### Forudsætninger:

Completion of Cisco Fundamentals of Fiber Optics Technology (FFOT)

It is also recommended that you have the following knowledge and skills:

- Basic knowledge of optical transport and protocols
- Basic knowledge of data network principles

### Yderligere Kurser:

- OPT300 - Cisco Optical Technology Advanced

## Indhold:

### Course

- Module 1: DWDM Optical Platform Review
- Module 2: Shelf and Card Installation
- Module 3: Fiber Jumper Installation
- Module 4: Linear Configurations
- Module 5: Node Turnup
- Module 6: Optical Channel Network Connection Circuits
- Module 7: Transponder and Optical Channel Client Connection Circuits
- Module 8: Multishelf
- Module 9: MSTP M6 SMR-Based Rings
- Module 10: 10-Gigabit Muxponder and Transponder Cards
- Module 11: 10-Gigabit with Y-Cable Protection
- Module 12: Alternative 10-Gigabit Protection
- Module 13: Any Rate Muxponder and Crossponder
- Module 14: Raman Amplifier
- Module 15: 40- and 100-Gigabit Transponder and Muxponder
- Module 16: Basic Troubleshooting

### Lab Outline

- Lab 1: System Setup and Login
- Lab 2: Node Turnup
- Lab 3: Creating Direct Circuits (OCHNC)
- Lab 4: Creating Transponder Optical Client Circuits (OCHCC)
- Lab 5: Configuring an Amplified SMR Ring
- Lab 6: Configuring Direct Circuits in an SMR Ring/Mesh
- Lab 7: Installing 10-Gbps Transponder Cards with Y-Cable Protection
- Lab 8: Alternate 10-Gigabit Protection (OTU-2 and PSM)
- Lab 9: Any Rate Muxponder and Crossponder Options
- Lab 10: Raman Amplifier
- Lab 11: MSTP Troubleshooting

---
