

Masterclass: PowerShell Ultimate Security

Varighed: 2 Days Kursus Kode: PSUS Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This intense, 2-day long practical training will provide you with the advanced knowledge needed to safely use and secure the PowerShell platform. It focuses on practices for safely handling sensitive data in scripts, what script structures are insecure, and whether the entire PowerShell can be exploited by an attacker. It will cover lots of advanced, key features like AMSI, code injection and signing, process of working with sensitive data and many more. During this training you will spend more than 80% of the course time working on PowerShell engine so that you will build some advanced scripts, which you can immediately use in your daily work!

This course is delivered by one of the best people in the market in the security field – with practical knowledge from tons of successful projects and with great teaching skills. The course contents are based on the author's more than 15 years of real-world experience working with PowerShell.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

Experienced PowerShell Scripters, IT Administrators, Pentesters and everyone with advanced knowledge and experience who wants to learn more about PowerShell practical features. The training requires advanced knowledge of PowerShell.

Forudsætninger:

The training requires advanced knowledge of PowerShell. We recommend to take PowerShell Advanced Course beforehand to gain more fluency in using PowerShell. If you are a novice in this topic, we recommend to take PowerShell Basic Course to be introduced to all fundamental PowerShell features and to solidify the most essential theoretical as well as practical knowledge.

Test og certificering

What is wonderful about our certification is that it is lifetime valid with no renewal fees – the technology changes, but fundamentals and attitude remain mostly the same. Our Virtual Certificates, which entitle you to collect CPE Points, are issued via Accredible.

Indhold:

Module 1

- PowerShell 3+ Security Features

Module 2

- Credentials

Module 3

- Elevation

Module 4

- Process History and Memory

Module 5

- Working with Sensitive Data

Module 6

- Code Injection

Module 7

- Execution in Memory

Module 8

- Code Signing

Module 9

- AMSI, AppLocker and CLM

Module 10

- Encoding and Obfuscation

Additional Information:

Unique exercises:

All exercises are based on PowerShell. During the course you will spend more than 80% of the course time working on PowerShell engine. The course comes with tons of practical exercises to be performed on our lab environment and author's presentation slides.

Platform and Technical Requirements:

To participate in the course you need a Stable internet connection. For best learning experience we also need you to have a webcam, headphones and a microphone. Open RDP port 3391 for the connection to the Lab environment is needed as well. We will setup a secure Zoom classroom for every day of the course – we will send you a safe link to join the conference by e-mail.
