

SAFe® 6.0 DevOps Practitioner (SDP) – Including Exam

Varighed: 2 Days Kursus Kode: SAFE-DO Leveringsmetode: Virtuel deltagelse

Beskrivelse:

To compete in a disruptive global market, every organization needs to deliver valuable technology solutions at the speed of business. This requires a shared DevOps mindset among all the people needed to define, build, test, deploy, and release software-driven systems—not just the engineers operating a CI/CD pipeline.

The two-day, interactive course helps people across technical, non-technical, and leadership roles work together to optimize their value stream from end to end. Attendees will learn what DevOps is, why it is important to every role, and design a continuous delivery pipeline that is tailored to their business. Attendees work in cross-functional teams to map their current state value stream from concept to cash, identify major bottlenecks to flow, and build an actionable implementation plan that will accelerate the benefits of DevOps in their organization.

Updated 4/2026

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

Learners taking this course are:

- Scrum Master
- Team Lead
- Release Train Engineer
- Business Analyst
- Agile Coach
- SAFe Program Consultant
- Consultant
- Architect
- Engineer
- Developer
- Director
- Quality Manager

Agenda:

- After attending the class, attendees should be able to:
- Explain how DevOps enables strategic business objectives
- Apply a CALMR approach to DevOps to avoid automating broken processes
- Understand how successful DevOps requires continuous exploration, continuous integration, continuous deployment, and the ability to release to end users on demand
- Incorporate continuous testing and continuous security into the delivery pipeline
- Use value stream mapping to measure flow and identify bottlenecks in the end-to-end delivery process
- Select DevOps skills and tools strategically for the fastest, most compelling results
- Prioritize DevOps solutions and investments for greatest economic benefit
- Design and implement a multi-phased DevOps transformation plan tailored to their organization
- Work with all roles and levels in the organization to continually optimize the value stream

Forudsætninger:

- None. All are welcome to attend the course without prior DevOps

Test og certificering

- Completion of this course gives you access to the exam and all

or SAFe experience.

related study materials as part of your Learning Plan in the SAFe Community Platform

The first two exam attempts are included in the course registration fee when taken within 60 days of course completion; if a third attempt is required, a retake fee will be applied. Please refer to the Retake Policy below:

First retake (third attempt overall): Available immediately after the second failed attempt

Second retake (fourth attempt overall): Available 10 days after the first retake

Third retake (fifth attempt overall): Available 30 days after the second retake

Additional retakes: Each requires a 30-day waiting period between attempts

Indhold:

Topics covered:

- Introducing DevOps
- Mapping your Continuous Delivery Pipeline
- Gaining alignment with Continuous Exploration
- Building quality with Continuous Integration
- Reducing time-to-market with Continuous Deployment
- Delivering Business Value with Release on Demand
- Taking action
