
Software Defined Networking Fundamentals

Varighed: 2 Days Kursus Kode: SDNF

Beskrivelse:

For the past 20 years, networking has not been able to quickly respond to changing business demands. Software-Defined Networking (SDN) promises to change this. SDN empowers the business to control network behavior by emphasizing the application instead of the network infrastructure.

Regardless of your hardware or software environment, this vendor-neutral course offers a clear picture of how SDN: Allows more efficient provisioning of new services and applications, Realises cost savings, Reduces configuration time and errors, Enhances security, Relates to/enhances cloud computing

Målgruppe:

This course has been designed for individuals interested in gaining a high-level understanding of SDN

Agenda:

- | | |
|--|--|
