

ServiceNow Platform Analytics Advanced

Duration: 2 Days **Course Code: SNPAA** **Delivery Method: Virtuel deltagelse**

Overview:

This two-day training builds upon the knowledge obtained in the Platform Analytics Fundamentals course. Here you apply advanced reporting, platform analytics, and application administration skills to take your historic trends and measurements to the next level.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Objectives:

- Learn how to apply advanced reporting, platform analytics, and application administration skills.
 - Take your historic trends and measurements to the next level.
-

Prerequisites:

- Attendees should have completed the Platform Analytics Fundamentals course (or equivalent) and have some experience with ServiceNow; advanced experience is not necessary.
 - A high-level overview of the Platform Analytics architecture, components, data flow, stakeholders, and deployment process is required to get the most out of the Platform Analytics Advanced class. Users should complete the Platform Analytics Fundamentals Review a self-paced, on-demand eLearning prior to attending the advanced class.
 - SNSAF - ServiceNow Administration Fundamentals
 - SNPAF - ServiceNow Platform Analytics Fundamentals
-

Content:

The following topics are discussed using a mix of labs and lecture:

- Understanding the Platform Analytics Adoption Journey
- Identify different Analytics Workspace components
- Understanding Scripts in Indicator Aggregates, Buckets, and Mappings
- Restricting Breakdown Element visibility with Allow List and Deny List
- Using various types of data sources to build data visualization in Platform Analytics
- Use Advanced data visualization techniques for impactful data summaries
- Building of more interactive dashboard in the Analytics Center
- Create Filters using data sources and apply them to various Visualizations
- Using Spotlight to identify high-priority work
- Leveraging Metrics for Reporting and Metric Based Indicators
- Applying Formula Indicator Techniques
- Configuring Index Indicators and External Indicators
- Mastering Analytics best practices and use cases for complex scenarios
- Deploying Analytics solutions, performing diagnostics, and system administration
