IBM DS8000 Implementation Workshop for z Systems

Varighed: 3 Days   Kursus Kode: SSF1G   Leveringsmetode: Virtuel deltagelse

Beskrivelse:

To learn the DS8000 storage subsystem and its hardware components and logical structure. The students configure the DS8000 storage subsystem using a DS8000 Storage Manager GUI and review the DS CLI interface for scripting configuration functions.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This course is for Information Technology (IT) storage administrators responsible for the implementation of storage resources in an SAN environment with hardware solutions and operating systems.

Agenda:

- Describe the hardware components of the IBM TotalStorage DS8000

- Describe the architecture of the IBM TotalStorage DS8000

- Describe the terminology and virtualization concepts for DS8000

- Describe the DS CLI interface installation and setup

- Describe the DS CLI interface commands and how to use them

- Describe the SSPC installation and setup

- Describe the DS Storage Management GUI interface installation and setup

- Describe the DS Storage Management GUI and how to use the panels to configure the DS8000 subsystem

- Describe the use and configuration of LPARs in the DS8000

- Describe the zSeries host attachment considerations for the DS8000

- Describe the DS8000 Copy Services interfaces

- Describe performance and tuning for DS8000

- Describe the use of TPC for the DS8000

Forudsætninger:

Students should:

- Complete Introduction to Data Storage Subsystems (SS05G)
- Complete Storage Management Fundamentals (SS06AGB)
- Have an understanding of DASD and date sets and how client hosts access data directly or through FICON channels

Indhold:

- Unit 1 - Unit 7
