

Korn and Bash Shell Programming

Varighed: 5 Days Kursus Kode: AN202G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This advanced-level course is for support staff for AIX on POWER systems.

Agenda:

- You will have a firm grounding in the Perl language and be able to:
- Write Perl scripts for data-processing, system administration, and other applications
- Use modules from the Perl Module Library to improve your efficiency

Forudsætninger:

You should have:

- An understanding of programming fundamentals: variables, flow control concepts such as repetition and decision.
- A working knowledge of AIX including the use of the vi editor, find and grep commands.

Students without this experience should attend AIX Basics (AN10G).

Indhold:

- | | | |
|----------------------------------|---|--|
| ■ Basic shell concepts | ■ Functions and typeset | ■ Using regular expressions |
| ■ Flow control in a shell Script | ■ Shell features such as arithmetic and string handling | ■ Using sed, awk and other AIX utilities |
