

Fundamental System Skills in z/OS

Varighed: 5 Days Kursus Kode: ES10G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This course is designed to teach students the fundamental practical skills to navigate and work in a z/OS environment.

This course consists of a mixture of theoretical and practical sections. The major objective of the course is to familiarize the students with the everyday activities involved in working in a z/OS environment. Therefore, the main focus is on the class exercises.

This includes the use of ISPF/PDF dialogs, TSO/E commands, JCL, z/OS Management Facility, UNIX System Services shell, and BookManager.

This course consists of several independent modules. The modules, including the lab exercises, stand on their own and do not depend on any other content.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

The intended audience for this class is IT personnel with a theoretical background of z/OS (for example, as taught in ES05G) and some general practical IT experience.

Agenda:

- After this course participants should be able to:
- Summarize the components of the IBM Z platform.
- Interpret the benefits of security in a z/OS environment.
- Analyze how TSO ISPF panels manage the z/OS environment.
- Implement TSO commands to manage the z/OS environment.
- Distinguish the purpose and functions of JES and JCL.
- Describe the purpose, benefits, and functions provided by z/OSMF.
- Execute UNIX processes.

Forudsætninger:

You should have a basic knowledge of the z/OS Environment.

Yderligere Kurser:

- ES07G z/OS JCL and Utilities
- ES52G z/OS REXX Programming Workshop
- OP05G Introducing z/OS UNIX System Services
- ES15G z/OS Facilities

Indhold:

This course teaches:

- How to log on to the z/OS system.
- How to work with TSO/E, ISPF/PDF, and the UNIX System Services shell.
- How to create, copy, rename, and delete z/OS data sets.
- How to work with UNIX System Services files.
- How to execute CLISTs and REXX execs.
- How to submit jobs for execution and view the output online.

Day 1

- Unit 1 - Review of ESA/390 and z/Architecture and z/OS
- Unit 2 - An Introduction to ISPF, ISPF/PDF, and RACF
- Unit 3 - Working with ISPF/PDF(Part 1)

Day 2

- Unit 3 - Working with ISPF/PDF(Part 2)

Day 3

- Unit 4 : TSO Commands
- Unit 5 Working with JCL (continued)

Day 4

- Review
- Unit 6 UNIX system Services (part 1)

Day 5

- Unit 6 UNIX system (Part 2)
- Review and close out
