

IBM Storage Protect version 8.1.12 Implementation and Administration

Varighed: 5 Days Kursus Kode: TS619G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

IBM Spectrum Protect 8.1.12 is a data backup and recovery solution designed to help you manage your data retention, reduce the cost of storage, and provide appropriate recovery point objectives to meet any service level agreement. IBM Spectrum Protect offers improved efficiency and flexibility using object-based data management and policy driven retention.

This five-day course will focus on implementation and basic administration of an IBM Spectrum Protect environment. The hands-on lab exercises are performed on a Windows 2016 environment. The course materials include examples of AIX and Linux commands, when different from Windows.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

Implementers and administrators who are new to IBM Spectrum Protect data management

Agenda:

- Describe the purpose of IBM SpectrumProtect
- Install and configure the IBM Spectrum Protect components
- Use the administrative and client interfaces
- Discuss storage methodology options and create storage pool
- Customize data movement and retention policies to meet business requirements
- Configure the IBM Spectrum Protect database and storage pools for protection
- Optimize client configuration
- Perform backup, restore, archive and retrieve operations
- Organize daily tasks required to protect the IBM Spectrum Protect environment
- Automate and monitor client and administrative tasks and events

Forudsætninger:

- Ability to navigate Windows 2016
- A basic understanding of concepts regarding client/server relationships

Indhold:

Unit 1: Concepts and components	Unit 5: Policy management, data movement, and expiration	Unit 9: Daily operations and maintenance
Unit 2: Installation and configuration	Unit 6: Server database and storage pool management	Unit 10: Schedules and reports
Unit 3: Interfaces and monitoring	Unit 7: Client configuration and management	
Unit 4: Storage pools and devices	Unit 8: Client data protection
