

## IBM Cloud Pak for Business Automation: Administration

Varighed: 1 Day    Kursus Kode: WB602G    Leveringsmetode: Virtuel deltagelse

### Beskrivelse:

This course provides technical professionals with the needed skills to administer IBM Cloud Pak for Business Automation. The course begins with an introduction to IBM Cloud Pak for Business Automation (CP4BA). You manage platform security for CP4BA and work with Business Teams. You explore the Red Hat OpenShift Container Platform (RHOCP) web console for container management such as Cluster Inventory, Events, CPU, and Memory. You examine the available observe options such as Metrics, Alerts, and Dashboards. You scale the application deployment. You customize the Cloud Pak Platform UI. To troubleshoot common Cloud Pak cluster problems, you get logs for nodes, cluster, and pods. You view the logs for pods by running commands and examine the logs in the RHOCP console. You learn how to troubleshoot the Container Engine and the pods that fail to start. The course concludes with the collection of MustGather files to submit it to the IBM Support team for troubleshooting.

### Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

### Målgruppe:

This course is intended for administrators of IBM Cloud Pak for Business Automation.

### Agenda:

- After completing this course, you should be able to:
- Configure access to the Cloud Pak Platform UI.
- Manage Business Teams.
- Perform basic administration tasks in the Red Hat OpenShift Container Platform web console.
- Customize the Cloud Pak Platform UI branding.
- Monitoring your IBM Cloud Pak for Business Automation system.
- Examine logs and troubleshoot common Cloud Pak cluster problems.

### Forudsætninger:

- Familiarity with the IBM Cloud Pak for Business Automation concepts
- Basic knowledge of Linux operating system
- Understanding of Containers and Kubernetes

## Indhold:

- Course introduction
  - Unit 1. Introduction to IBM Cloud Pak for Business Automation
  - Unit 2. Configuring access to the Cloud Pak Platform UI
  - Exercise 1. Configuring access to the Cloud Pak Platform UI
  - Unit 3. Managing Business Team
  - Exercise 2. Managing Business Teams
  - Unit 4. Administering Cloud Pak for Business Automation
  - Exercise 3. Administering Cloud Pak for Business Automation
  - Unit 5. Customizing the Cloud Pak Platform UI
  - Exercise 4. Customizing the Cloud Pak Platform UI
  - Unit 6. Monitoring Cloud Pak for Business Automation
  - Exercise 5. Monitoring IBM Cloud Pak for Business Automation
  - Unit 7. Course summary, badge and other learning resources
-
