

IBM Business Automation Workflow 23.0.2: Creating and Managing Case Management Solutions

Varighed: 1 Day Kursus Kode: WB880G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

In this two-day intermediate-level course, you learn about case solution design using IBM Business Automation Workflow (BAW). You export and import case solutions. You define various case objects such as properties, choice lists, roles, business objects, and case types. You create To-do Tasks and Container activities and implement preconditions and Sets to manage activities. You create custom property views for case pages. You model BPM processes for case activities and create client-side human services. You create case stages and manage the stages manually and automatically with JavaScript. This course also teaches you how to create custom pages and implement Free Form page layout and utility widgets for case solutions.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids- og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This course is intended for case solution developers of IBM Business Automation Workflow.

Agenda:

- After this course participants should be able to:
- Define properties, choice lists, roles, and business objects for a case solution
