

IBM MQ V9.1 System Administration (using Windows for labs)

Varighed: 5 Days Kursus Kode: WM156G Leveringsmetode: Virtuel deltagelse

Beskrivelse:

This course teaches you how to customize, operate, administer, and monitor IBM MQ on-premises on distributed operating systems. The course covers configuration, day-to-day administration, problem recovery, security management, and performance monitoring. In addition to the instructor-led lectures, the hands-on exercises provide practical experience with distributed queuing, working with MQ clients, and implementing clusters, publish/subscribe messaging. You also learn how to implement authorization, authentication, and encryption, and you learn how to monitor performance.

Note: This course does not cover any of the features of MQ for z/OS or MQ for IBM i.

Virtuel deltagelse

Et V&C Select kursus indholder nøjagtig det samme som et almindeligt kursus. Før kursusstart modtager man kursusmaterialet. Dernæst logger man på kurset via internettet og ser via sin pc den selvsamme præsentation som de øvrige deltagere, man kommunikerer via chat med underviseren og de øvrige deltagere på kurset. Denne uddannelsesmodel er både tids-og omkostningsbesparende og kan være et oplagt alternativ til almindelig klasseundervisning, hvis man f.eks. har et begrænset rejsebudget.

Målgruppe:

This course is designed for technical professionals who require the skills to administer IBM MQ.

Agenda:

	After completing	this	course,	you should	be able to:
--	------------------	------	---------	------------	-------------

Describe the IBM MQ deployment options

Create and manage queue managers, queues, and channels

 Use the IBM MQ sample programs and utilities to test the IBM MQ network

Configure distributed queuing

Configure MQ client connections to a queue manager

Define and administer a queue manager cluster

Administer Java Message Service (JMS) in MQ

Implement basic queue manager restart and recovery procedures

Use IBM MQ troubleshooting tools to identify the cause of a problem in the IBM MQ network

Manage IBM MQ security

Monitor the activities and performance of an IBM MQ system

Forudsætninger:

- Basic knowledge of IBM MQ concepts and features
- Some knowledge of TCP/IP configuration
- Basic experience with Windows 2016 system administration

tlf.nr.: 44 88 18 00

Indhold:

Introducing IBM MQ	Exercise: Implementing a basic cluster	Diagnosing problems	
Exercise: Getting started with IBM MQ	Publish/subscribe messaging	Exercise: Running an IBM MQ trace	
Working with IBM MQ administration tools	Exercise: Configuring publish/subscribe message queuing	Backing up and restoring IBM MQ messages and object definitions	
Exercise: Working with IBM MQ administration tools	Implementing basic security in IBM MQ	Exercise: Using a media image to restore a queue	
Configuring distributed queuing	Exercise: Controlling access to IBM MQ	Exercise: Backing up and restoring IBM MQ object definitions	
Exercise: Implementing distributed queuing	Securing IBM MQ channels with TLS		
Managing clients and client connections	Exercise: Securing channels with TLS	High availability	
Exercise: Connecting an IBM MQ client	Authenticating channels and connections	Monitoring and configuring IBM MQ for performance	
Advanced IBM MQ client features	Exercise: Implementing connection authentication	Exercise: Monitoring IBM MQ for performance	
Working with queue manager clusters	Supporting JMS with IBM MQ	Exercise: Monitoring resources with the IBM MQ Console
