Managing Decisions in IBM Operational Decision Manager V8.9

Varighed: 5 Days   Kursus Kode: WB401G

Beskrivelse:

This course introduces business analysts to IBM Operational Decision Manager V8.9. You learn the concepts and skills that are necessary to capture, author, validate, and manage business rules with Operational Decision Manager.
IBM Operational Decision Manager provides a complete platform for managing business rules by helping to automate and govern decisions across processes and applications. This course focuses on the iterative nature of working collaboratively with business policy experts and development teams on rule projects. Through instructor-led presentations and hands-on lab exercises, you learn about the core features of Operational Decision Manager. You also receive intensive training in modeling business rule vocabulary, rule discovery, rule authoring, and rule governance and management. The course uses realistic scenarios and a case study to illustrate the principles and good practices for discovering, analyzing, and authoring business rules.

Målgruppe:

This course is designed for business analysts.

Agenda:

- Describe the benefits of implementing an Operational Decision Manager solution

- Identify the main user roles and tasks that are involved in designing and developing an Operational Decision Manager solution

- Explain modeling concepts and the UML notation that is relevant to modeling for business rules

- Define and implement object models for business rules

- Set up the rule authoring environment in Designer by working with decision services and synchronizing across development and business environments

- Transform business policy into rule statements and make sure that they form a complete and coherent set of rules

- Use the Operational Decision Manager rule editors to author business rules and decision tables

- Run tests and simulations in the Decision Center Business console to validate decision logic and rule changes

- Work with Decision Center decision service administration tools

- Manage user access and permissions in the Business console

- Use Operational Decision Manager tools to support decision governance

Forudsætninger:

- Experience with identifying and defining business policies and rules
- A basic understanding of business models

Indhold:

Introducing IBM Operational Decision Manager V8.9

Exercise: Operational Decision Manager in action

Modeling for business rules

Exercise: Building the model on paper

Exercise: Implementing the model

Understanding decision services

Exercise: Setting up a decision service

Working with the BOM

Exercise: Working with the BOM

Introducing Decision Center

Exercise: Exploring the Decision Center Business console

Introducing rule authoring

Exercise: Understanding the case study

Discovering and analyzing rules

Exercise: Discovering rules

Exercise: Analyzing rules

Working with conditions in rules

Exercise: Working with conditions in rules

Working with definitions in rules

Exercise: Working with definitions in rules

Writing complete rules

Exercise: Writing complete rules

Authoring decision tables

Exercise: Authoring decision tables

Exercise: Authoring rules: Putting it all together

Running tests and simulations

Exercise: Running tests and simulations in the Business console

Working with Decision Center administrative tools

Exercise: Working with management features in Decision Center

Exercise: Managing user access in Decision Center

Introducing decision governance

Exercise: Working with the decision governance framework
