z/VM and Linux on IBM Z and LinuxONE Bootcamp

Varighed: 5 Days   Kursus Kode: ZL00G   Leveringsmetode: Company event (Firmakursus)

Beskrivelse:

This course introduces the system programmer to the tasks required to support a z/VM operating system. It provides an overview of the processes required to install z/VM and perform the required tailoring steps to support guest operating system virtual machines and CMS users. The students will leave the course with the knowledge to perform the steps to add guest systems and other virtual machines to the z/VM system, to apply service to the z/VM system, and to define a minimal TCP/IP configuration. Additionally this course is designed to teach the implementation of SUSE Linux on System z.
