

IBM Cognos Analytics: Enterprise Administration (V11.1.x)

Duration: 2 Days **Course Code: B6255G**

Overview:

This offering covers the fundamental concepts of installing and configuring IBM Cognos Analytics, and administering servers and content, in a distributed environment. In the course, participants will identify requirements for the installation and configuration of a distributed IBM Cognos Analytics software environment, implement security in the environment, and manage the server components. Students will also monitor and schedule tasks, create data sources, and manage and deploy content in the portal and IBM Cognos Administration.

Target Audience:

Administrators

Objectives:

- Please refer to course overview
-

Prerequisites:

- Basic knowledge of Web application server architectures
 - Basic knowledge of security systems administration
 - Experience using basic Windows functionality
 - Knowledge of your business requirements
-

Content:

IBM Cognos Analytics components	Define authentication in IBM Cognos Analytics	Manage schedules
Administration workflow	Define authorization in IBM Cognos Analytics	Manage content in IBM Cognos Administration
IBM Cognos Administration	Identify security policies	Data sources and packages
IBM Cognos Configuration	Secure the IBM Cognos Analytics environment	Manage visualizations in the library
Identify IBM Cognos Analytics architecture	Administer the IBM Cognos Analytics server environment	Deployment
Features of the IBM Cognos Analytics architecture	Administer IBM Cognos Analytics servers	Other content management tasks
Examine the multi-tiered architecture, and identify logging types and files	Monitor system performance	Examine departmental administration capabilities
Examine IBM Cognos Analytics servlets	Manage dispatchers and services	Create and manage team members
Performance and installation planning	Tune system performance, and troubleshoot the server	Manage activities
Balance the request load	Audit logging	Create and manage content and data
Configure IBM Cognos Analytics	Dynamic cube data source administration workflow	Manage system settings
Secure the IBM Cognos Analytics environment	Manage run activities	Manage Themes, Extensions, and Views
Identify the IBM Cognos Analytics security model	View current, past, and upcoming activities	Share services with multiple tenants
