

CISM®, Certified Information Security Manager® + Practice questions (QAE)

Duration: 4 Days Course Code: CISM

Overview:

The Certified Information Security Manager (CISM) training course will help you obtain the CISM certification. This ISACA certification is the leading certification for experienced information security managers, internationally recognised. Scroll down to learn more about this certification. **Continuing Professional Education (CPE) : 31 Practice questions (QAE = Questions, Answers and Explanations) : 12 month access**

Target Audience:

ISACA's Certified Information Security Manager (CISM) certification is for those with technical expertise and experience in IS/IT security and control and wants to make the move from team player to manager. CISM can add credibility and confidence to your interactions with internal and external stakeholders, peers and regulators. Experienced information security managers and those who have information security management responsibilities, including IT consultants, auditors, managers, security policy writers, privacy officers, information security officers, network administrators, security device administrators, and security engineers.

Objectives:

Learning Objectives:

Module 1: Information Security Governance

- Describe the role of governance in creating value for the enterprise.
- Explain the importance of information security governance in the context of overall enterprise governance.
- Describe the influence of enterprise leadership, structure and culture on the effectiveness of an information security strategy.
- Identify the relevant legal, regulatory and contractual requirements that impact the enterprise.
- Describe the effects of the information security strategy on enterprise risk management.
- Evaluate the common frameworks and standards used to govern an information security strategy.
- Explain why metrics are critical in developing and evaluating the information security strategy.

Information Risk Management and Compliance

Information Security Program Development and Management

- Outline the processes and procedures used to eradicate and recover from incidents.
- Describe the requirements and benefits of documenting events.
- Explain the relationship between business impact, continuity and incident response.
- Describe the processes and outcomes related to disaster recovery.
- Explain the impact of metrics and testing when evaluating the incident response plan.

Testing and Certification

Practice questions (QAE = Questions, Answers and Explanations) are available online via a voucher. The voucher is part of the course material. It allows you to practice during the training and is available up to 12 months after the training

To become officially CISM certified, you need to meet the requirements below:

- pass the official CISM exam
- have at least 5 years of relevant work experience in at least two CISM domains (or 4 years of experience supplemented by an HBO+ education).

The CISM exam is focused on the four domains defined by ISACA. The actual exam takes 4 hours and consists of 150 English-language multiple choice questions. For more information on certification, please visit: <https://www.isaca.org/credentialing/cism>

The exam voucher for the official CISM exam will no longer be included in the course price from January 2023. You can order this exam as a separate product with it.

Follow-on-Courses:

- CISSP Certification Preparation
- CISA, Certified Information Systems Auditor

Content:

Domain 1: Information Security Governance

- Enterprise Governance Overview
- Organizational Culture, Structures, Roles and Responsibilities
- Legal, Regulatory and Contractual Requirements
- Information Security Strategy
- Information Governance Frameworks and Standards
- Strategic Planning

Domain 2: Information Risk Management

- Risk and Threat Landscape
- Vulnerability and Control Deficiency Analysis
- Risk Assessment, Evaluation and Analysis
- Information Risk Response
- Risk Monitoring, Reporting and Communication

Domain 3: Information Security Program Development ; Management

- IS Program Development and Resources
- IS Standards and Frameworks
- Defining an IS Program Road Map
- IS Program Metrics
- IS Program Management
- IS Awareness and Training
- Integrating the Security Program with IT Operations
- Program Communications, Reporting and Performance Management

Domain 4: Information Security Incident Management

- Incident Management and Incident Response Overview
- Incident Management and Response Plans
- Incident Classification/Categorization
- Incident Management Operations, Tools and Technologies
- Incident Investigation, Evaluation, Containment and Communication
- Incident Eradication, Recovery and Review
- Business Impact and Continuity
- Disaster Recovery Planning
- Training, Testing and Evaluation
