

Configuring Cisco Unified Computing System

Duration: 3 Days Course Code: DCCUCS Version: 1.0

Overview:

The **Configuring Cisco Unified Computing System (DCCUCS) v1.0** shows you how to deploy, secure, operate, and maintain Cisco Unified Computing System (Cisco UCS) B-series blade servers, Cisco UCS C-Series, and S-Series rack servers for use in data centers. You will learn how to implement management and orchestration software for Cisco UCS. You will gain hands-on practice on: configuring key features of Cisco UCS, Cisco UCS Director, and Cisco UCS Manager; implementing UCS management software including Cisco UCS Director, Cisco UCS Manager, and Cisco Intersight; and more.

This course will help you:

Gain in-depth experience implementing and maintaining Cisco UCS servers to help you accelerate and provide robust UCS deployments
Gain knowledge and skills through Cisco's unique combination of lessons and hands-on practice using enterprise-grade Cisco learning technologies, data center equipment, and software

Prepare for the new CCNP Data Center and CCIE Data Center certifications, that will be available beginning February 24, 2020
