
Parallel Sysplex Implementation Workshop

Duration: 5 Days Course Code: ES42G

Overview:

This course is developed for systems programmers working on an implementation of a Parallel Sysplex. It covers the details of z/OS and z/OS-related products and subsystems exploiting the Parallel Sysplex components. It is focused on the resource sharing side.

Target Audience:

The audience should include system and subsystem programmers and personnel responsible for the implementation of the hardware and software for a Parallel Sysplex.

Objectives:

- | | |
|---|--|
| ■ Understand the steps to implement a basic and full Parallel Sysplex | ■ |
| ■ | ■ Implement the features and functions of a Parallel Sysplex |
| ■ Implement a basic sysplex | ■ |
| ■ | ■ Implement the coupling facility key exploiters |
| ■ Implement a multisystem base sysplex | ■ |
| ■ | ■ Understand the different recovery scenarios |
| ■ Implement the connectivity for a Parallel Sysplex | |
-

Prerequisites:

Experience in the following areas is recommended:

- | | |
|--|--|
| ■ Installing and testing z/OS and related products | |
| ■ HCD coding | |
| ■ PARMLIB settings | |
-
