
Bottom Line Innovation

Duration: 3 Days Course Code: GBLIE100

Overview:

Innovation is the one key business competency that can quickly separate the winners from the rest in this fast-paced competitive environment. The sustaining value for more and more organizations is a prime focus on their intellectual capital as creators of innovation. This is becoming an organization's most important and valuable asset. "Value innovation is not defined as outpacing the competition; it is end-running the competition by creating new value propositions and thus having no competition for an initial period." (World Economic Forum) The Bottom Line Innovation program provides a proven process for the discovery of dozens of new, unexpected, and useful ideas targeted at important organization.

Benefits for the Individual Expanded thinking abilities beyond limited, traditional approaches A clear focus and approach for tackling business issues in innovative ways Generation of many more ideas and better scrutiny of selected ideas A more results-oriented method for selling ideas internally Understanding of and ability to immediately apply pattern-breaking techniques which increase the capability to generate innovative ideas

Benefits for the Organization A systematic process for innovation to address business needs and issues Translates vision, mission, and organizational imperatives into an actionable process A means for building and leveraging your organization's intellectual capital A process for making innovation repeatable and sustainable Improves the quantity and quality of innovative ideas
