

Migrating to AWS

Duration: 2 Days **Course Code: GK4532** **Delivery Method: Virtual Learning**

Overview:

This course is for individuals who seek an understanding of how to plan and migrate existing workloads to the AWS Cloud. You will learn about various cloud migration strategies and how to apply each step of the migration process, including portfolio discovery, application migration planning and design, conducting a migration, and post-migration validation and application optimization. Hands-on labs reinforce learning, and each lab is designed to provide you with the understanding and foundation necessary to complete migration tasks in your organization.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is intended for:

- Solutions architects
 - Software engineers
 - IT project managers
 - Operation leads
 - Other individuals involved in the planning and running of migration projects
-

Objectives:

- | | |
|---|---|
| ■ In this course, you will learn to: | ■ Determine an organization's application migration readiness |
| ■ Recognize the common business and technical drivers for migrating to the cloud | ■ Discover a portfolio and gather data necessary for migration |
| ■ Summarize the three phases of a migration and associated objectives, tasks, and stakeholders for each | ■ Plan and design an application migration strategy |
| ■ Describe AWS architecture, tools, and migration best practices | ■ Perform and validate application migration to the cloud |
| ■ Distinguish between the various cloud migration strategies and when each is most appropriate | ■ Optimize applications and operations after migrating to the cloud |
-

Prerequisites:

We recommend that attendees of this course have:

- Familiarity with enterprise IT infrastructure (hardware and software)
 - Completed the AWS Technical Essentials or Architecting on AWS classroom training
 - Achieved their AWS Certified Solutions Architect – Associate certification (optional)
-

Content:

Day 1

Module 1: What Is a Cloud Migration?

- Drivers and outcomes of a cloud migration
- Planning for a successful cloud migration
- The three-phase migration process

Module 2: Assessing Migration Readiness

- The assess phase
- Cloud readiness assessment tools
- Examine your IT landscape and build your business case
- Group Exercise: The Cloud Adoption Tool (CART)

Module 3: Preparing for a Migration and Understanding Related Workstreams

- Mobilize phase
- Migration-related workstreams

Module 4: Discovering Landing Zones and Their Benefits

- What is a landing zone?
- Custom multi-account structure with AWS Organizations
- AWS Control Tower
- Customizations for AWS Control Tower (CfCt)
- Planning for connectivity

Module 5: Building a Landing Zone

- Planning a landing zone
- Design a multi-account structure
- Governance policies
- Planning for connectivity
- Demonstration: AWS Control Tower
- Hands-On Lab: Connecting Your On-Premises Network and Directory Services to AWS

Module 6: Discovering the Portfolio and Understanding Migration Strategies

- Detailed portfolio discovery workstream
- Evaluating cloud readiness
- Cloud migration strategies
- Group Exercise: Choose a migration strategy (scenario-based)

Day 2

Module 7: Understanding and Choosing Portfolio Discovery Tools

- Migration Evaluator
- AWS Migration Hub and AWS Application Discovery Service
- AWS Systems Manager and Amazon CloudWatch
- Hands-On Lab: Gathering Application Data Necessary for Migration

Module 8: Planning and Designing a Migration

- Plan the migration overall
- Building the migration factory
- Design the migration for each application
- Group Exercise: Build a migration plan
- Group Exercise: Design for migration

Module 9: Performing the Migration to AWS

- Server migration process
- Server migration tools
- VMware Cloud on AWS
- AWS Migration Hub
- AWS Application Migration Service (AWS MGN)
- Evaluating server migration tools
- Hands-On Lab: Migrating an Application to AWS

Module 10: Understanding Database and Data Migration Services

- Data migration
- Online data migration services
- Offline data migration services
- Database migration
- Hands-On Lab: Migrating an Existing Database to Amazon Aurora

Day 3

Module 11: Understanding Additional Migration Support Options

- AWS Managed Services
- AWS Service Catalog
- AWS Service Catalog integrations
- Microsoft workloads on AWS
- SAP on AWS

Module 12: Integrating, Validating, and Cutting Over Applications

- Migrate and modernize phase
- Cutover strategy

Module 13: Modernizing and Optimizing Applications

- Cost optimization
- Performance optimization
- AWS tools used to optimize
- Modernize the enterprise
- Use containers
- Use serverless architectures
- Hands-On Lab: Optimizing an Application with Amazon S3 and Amazon ECS

Module 14: Understanding Operations Tools, Integration Testing, and Automation

- AWS Config
- Infrastructure and operations as code
- Adopting a DevOps approach
- Automate change and configuration
- Automate management

Module 15: Migration Best Practices

- Course review
- Best practices
- Continue your learning
- Hands-On Lab: Automating Application Deployments

Additional Information:

Activities

This course includes presentations, hands-on labs, demonstrations, assessments, and group exercises.
