

AWS Discovery Day: Securing your AWS Cloud

Duration: 1 Day **Course Code: GKAWS-SOA** **Delivery Method: Virtual Learning**

Overview:

The AWS Discovery Day is free of charge virtual event that is designed to introduce AWS cloud computing concepts and foundational infrastructure services. Whether you are thinking of migrating to the AWS Cloud or already have a workload running on AWS, securing your data and resources should be at the top of the list. This event introduces several AWS services you can use to improve your security posture. The event covers the different security design principles that will help you to plan your security approach in the AWS Cloud and provides information on resources you can use to further your knowledge around security on AWS

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Content:

Define the cloud and how it works	Describe the basic global infrastructure of the cloud	Describe the different design principles for security in the cloud
Explain the benefits of the AWS Cloud	Identify security benefits and responsibilities of using the AWS Cloud	Determine which AWS services you can use to improve your security posture
