

ISO/IEC 27002 Manager (PECB certified) + exam

Duration: 3 Days Course Code: ISO27002M Version: 2.0

Overview:

ISO/IEC 27002 Manager training course provides information on the implementation and management of information security controls based on ISO/IEC 27002.

Why should you attend?

ISO/IEC 27002 Manager enables participants to acquire the necessary knowledge and skills to support an organization in selecting, implementing, and managing information security controls based on ISO/IEC 27002. The training course provides information that will help participants in gaining a thorough understanding of how information security risks can be treated by selecting relevant controls, especially in the context of an information security management system (ISMS).

A PECB ISO/IEC 27002 Manager certification will enable you to demonstrate your comprehensive knowledge in the implementation and management of information security controls based on industry best practices.

Target Audience:

This training course is intended for: Managers involved in the implementation of an information security management system (ISMS) based on ISO/IEC 27001 IT professionals and consultants seeking to enhance their knowledge in information security Members of an ISMS implementation or information security team Individuals responsible for information security in an organization

Objectives:

- By successfully completing this training course, you will be able to:
 - Discuss the relationship between ISO/IEC 27001, ISO/IEC 27002, and other standards and regulatory frameworks
- Explain the fundamental concepts of information security, cybersecurity, and privacy based on ISO/IEC 27002
- Support an organization in effectively determining, implementing, and managing information security controls based on ISO/IEC 27002

Prerequisites:

The main requirements for participating in this training course are having a fundamental understanding of ISO/IEC 27002 and comprehensive knowledge of information security.

Testing and Certification

- Certification fees and examination fees are included in the price of the training course
- Candidates who have completed the training course but failed the exam are eligible to retake it once for free within a 12-month period from the initial date of the exam

The “PECB Certified ISO/IEC 27002 Manager” exam meets all the requirements of the PECB Examination and Certification Program (ECP). It covers the following competency domains:

Domain 1: Fundamental principles and concepts of information security, cybersecurity, and privacy

Domain 2: Information security controls based on ISO/IEC 27002

For specific information about exam type, languages available, and other details, please visit the [List of PECB Exams](#) and the [Examination Rules and Policies](#).

Content:

Day 1: Introduction to ISO/IEC 27002

Day 2: Information assets, people controls, physical controls, and operational security controls

Day 3: Information security incident management and monitoring of information security controls and certification exam

Additional Information:

Participants will be provided with training material containing over 350 pages of information and practical examples. An attestation of course completion worth 21 CPD (Continuing Professional Development) credits will be issued to the participants who have attended the training course.

Educational approach This training is based on both theory and best practices used in the implementation and management of information security controls. Participants are encouraged to communicate and discuss with each other while partaking in exercises and quizzes. The structure of quizzes is similar to that of the certification exam.
