ISTQB Advanced Test Analyst + exam

Duration: 4 Days   Course Code: ISTQBA-TA   Delivery Method: Virtual Learning

Overview:

The three-day ISTQB Advanced Test Analyst course prepares participants for the ISTQB Advanced Level Test Analyst certificate. After the training the participant can design and execute functional (black box) tests, aligned with the development approach used and related to the outcomes of risk analyses. The focus of the ISTQB Advanced Test Analyst is on functionality, usability and user friendliness.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This training is intended for professionals in software testing, such as testers, test analysts, test engineers, test consultants, test managers, acceptance testers and developers.
The ISTQB Advanced Test Analyst course is also suitable for anyone who wants to gain in-depth knowledge about designing software tests, such as project managers, quality managers, development managers, business analysts, heads of IT and management consultants.
